FRUIT TREES

Espalier Trees Lend Beauty to the Home

... and produce fruit of delicious quality

FOR many years gardeners of Europe have depended upon Espalier trees for much of their landscape work because they are ideal for utilizing and beautifying places where space is limited. These trees are now available in America and have become one of the greatest assets to modern gardening.

The Espalier type of fruit tree is field grown in the vicinity of Portland, Oregon, by the United States Espalier Nursery, Inc. They are hardy and adaptable to a wide variety of soils. Espalier trees will do well in all localities where other fruit trees are grown.

Correctly trained Espalier trees make a beautiful decoration for the side of your home or garage, and are particularly

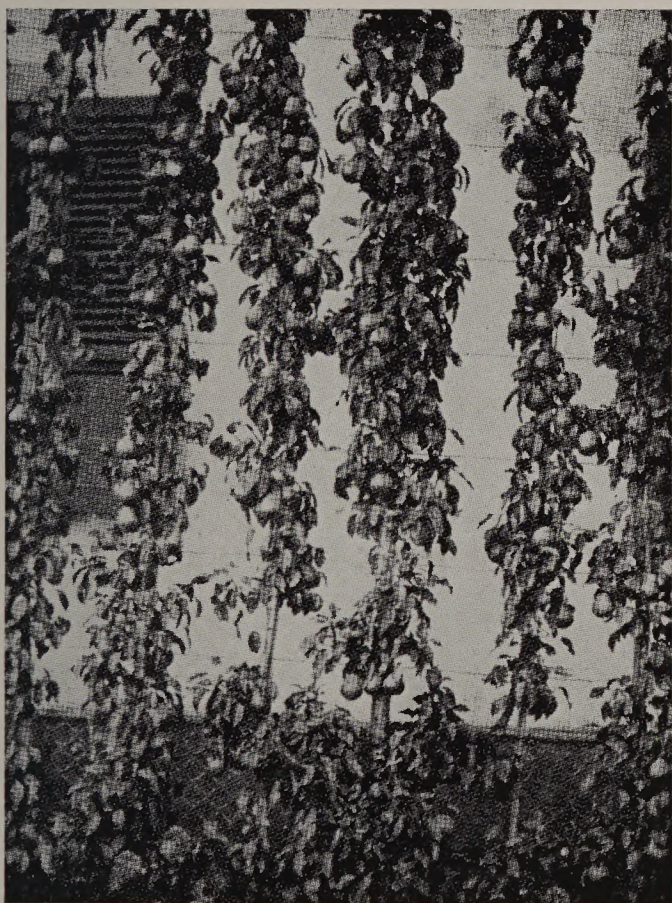

adapted to planting along a fence or trellis. Many homes are creating arbors and outdoor living rooms; for which the true Espalier is used in the formation of beautiful green walls of foliage. When in bloom they present an array of lovely blossoms.

Fruit from Espalier trees is *actually richer in flavor and juicier* than the same varieties grown on ordinary trees; and, in most cases, is much larger in size.

To every home, whether it be large or small, the Espalier fruit tree offers the opportunity to add that distinctive touch of grace and beauty that has found such a welcome in Europe, and, at the same time, provide delicious fruit for the table that could not be obtained from any other type of tree.

This five-year old Espalier pear tree planted against the garage adds to the beautiful landscaping of this garden. Notice how it is burdened with large, delicious fruit.

These separate vertical cordons can be planted single with striking effect. They illustrate the extreme in space economy which can be gained with true Espaliers.

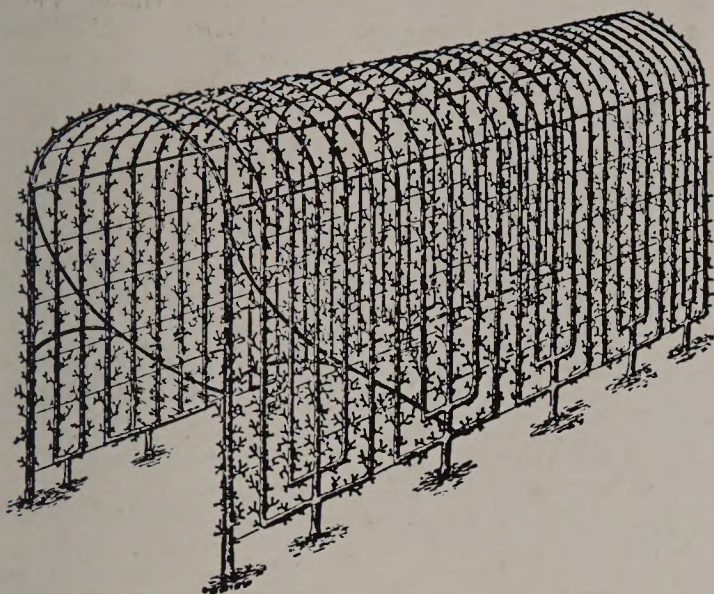

Artistic effect achieved with Espalier peach tree.

An Orchard on the Side of Your Home

Imagine picking your own delicious table fruit from a tree growing on the side of your home! Genuine Espalier fruit trees require little space in which to grow and are ideal for planting along the side of your house, garage or fence. They produce fruit that is larger in size, richer in color and flavor than fruit from ordinary trees. With many varieties from which to choose, it is possible to enjoy having an orchard of your own within the limits of your yard.

Variety of Designs is Unlimited

The variety of shapes possible with genuine Espalier trees has no limit. Shown in this folder are but a few of the many different ways that they can be adapted to the landscaping of any home or garden, whether the space available be large or small. As readily formed as a row of single, branchless cordons is a luxurious arbor that is shady, beautiful and productive. Those doing their own gardening will especially enjoy developing their own ideas of design.

Growers and dealers of the true Ornamental Imported and Domestic Espalier "Vine" Fruit Trees.

Above: "Palmette" pear tree in training process at our nursery. It is only three years old and bears large and delicious fruit.

Below: Double row of Espalier trees planted to provide a dividing lane between vegetable and flower gardens. Varieties of trees used are—from left to right: cherries, apples, pears and apricots.

A Rare Treat from Switzerland

More than 60 years of trial and research in Switzerland has brought this type of fruit tree to perfection. Through importation of foundation and budding stock from European sources, and several years of trial along the lines of acclimatization, the United States Espalier Nursery, Inc., has succeeded in establishing Espaliers in the Pacific Northwest, from which center they can be distributed to all parts of the United States.

Starting with scions of one of the select varieties from which genuine Espalier trees can be produced, it takes from seven to eight years of propagation to produce scions adaptable to Espalier training. These shoots are grown, then, not on the root stocks used for most standard fruit varieties, but on roots of an entirely different character, giving an exceptionally strong root foundation. The combination develops not only the tendency to produce fruit while the tree is very young, but fruit that is large in size, better in color, with a superior flavor and a meat structure of fine quality.

Espaliers will appeal to growers who like to care for their own gardens as well as to owners of large estates where professional gardeners are in charge. Complete instructions and illustrations concerning the care of Espalier fruit trees will be furnished free of charge to all purchasers of our trees.

Below: This apple tree is only two years old with fruit as heavy as one pound each. You will not need a ladder to pick the fruit, for the tree is less than three feet tall.

Varieties of Espalier Fruit Trees

Apples

- ALLINGTON PEPPING:** A late medium-large, striped red and yellow apple. Excellent for dessert.
- GRAVENSTEIN:** A large attractive orange-yellow apple overlaid with stripes of red. Early.
- ANANAS:** A late medium large golden yellow apple of fine flavor.
- CLEAR or YELLOW TRANSPARENT:** A very early medium large, pale yellow apple. Abundant bearer.
- KING DAVID:** A winter apple. Very large fruit, handsome yellow-green with bright red cheek. Excellent for dessert.
- SPITZENBERG:** Medium to large fruit, deep red, flesh yellow, crisp, sub-acid and highly flavored.
- JONATHAN:** Large fruit, deep red, covered with yellow patches. Tree very beautiful. A late apple.
- CANADA RENETTE:** Large lemon-yellow with red splashes. Flesh firm, rich, juicy and finely flavored. Good bearer. A late apple.

- MONTROSE:** A large apple, red striped, heavy bearer. November.
- RED DELICIOUS:** A red striped, long pointed apple of fine flavor and bouquet. October, November.
- GOLDEN DELICIOUS:** Golden yellow apple of the delicious variety.
- BERNER ROSE:** A medium large, deep red and very sweet apple. Heavy bearer. November, December.
- ROME BEAUTY:** Smooth round apple, looks like the Gravenstein but with more color. A fall apple, white meat of fine flavor.
- RED ASTRACHAN:** Early, red cheeked turning to all red. Excellent for dessert.
- GOLDEN RENETTE:** A late apple of large size with rich, golden yellow fruit.

Pears

- PASTOREN:** A late pear with excellent fruit. Large, lemon-yellow, with soft blush. An excellent keeper, fine grained and juicy.
- TONGERN:** Large, golden brown dotted with soft red of extraordinary beauty. Fruit ripens in early fall and is juicy and highly flavored.

- JULY RAINBOW:** An early delicious pear ripening in July.
- GELLERT BUTTER PEAR:** An early fall pear, large lemon-yellow over-spread with cinnamon russet. Very juicy and sweet.
- WILLIAM'S BUTTER PEAR:** Similar to the Bartlett. Large fine fruit but without the musky flavor of the Bartlett. Rich yellow with faint blush on exposed cheek. Delicious flavor. Early fall.
- CLAPPS DARLING:** Large fruit. Pale lemon-yellow with brown dots. Fine texture juicy with a rich vinous flavor. Early fall. August, September.
- TREVOUX:** A large lemon-yellow early pear.

Plums and Prunes

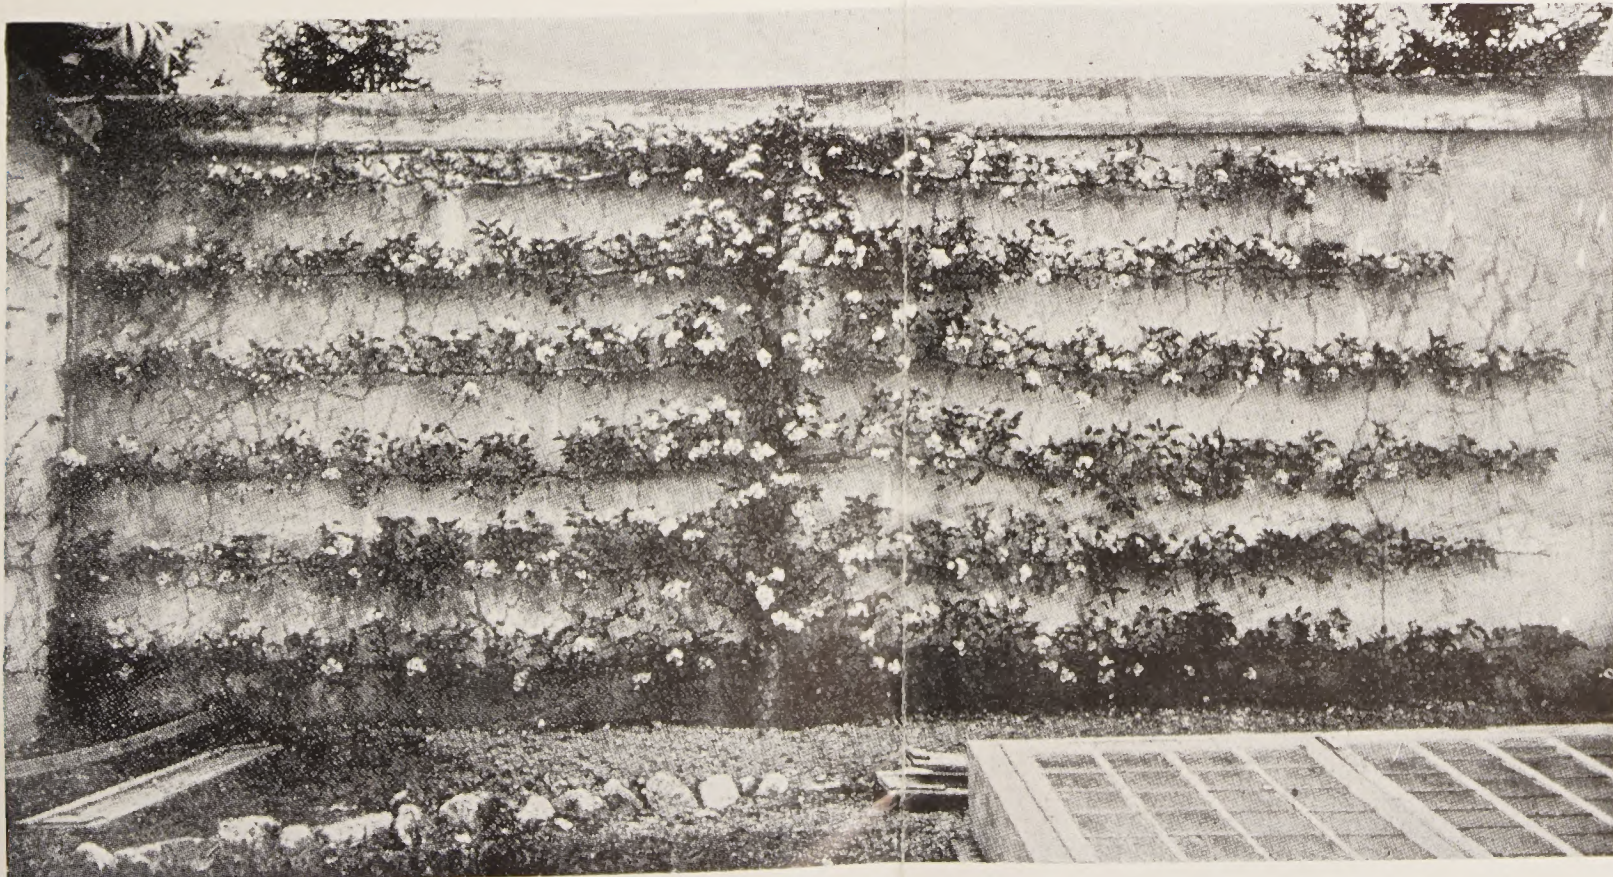

- FOREST ROSE:** Large round fruit. Beautiful dark red. August.
- A few other varieties of very limited number.
- EARLY ZIMMERS:** Medium large fruit. Yellow flesh, skin purple blue. Free-stone. Ripening season: August.
- REINE CLAUDE:** Large delicious fruit. Dark purple. August.

- KIRKE:** Large, crimson-violet. Rich flavor. August.
- ITALIAN PRUNE:** A fine late prune. Oval, purple fruit. Juicy and very productive. Delicious. September.

Cherries

- OSTHEIMER WEICHSEL:** A hardy cherry. Fruit large, skin deep red turning to dark red at maturity. Classed as a sour cherry, it is much sweeter and juicier than the ordinary pie cherry. Unsurpassed for jam, jelly or pie. Will not split in rainy weather. July.
 - LOT:** Very similar to the Ostheimer Weichsel, but ripening a little later.
 - BOHEMIAN:** Large fine fruit, deep blood-red. Sweet and juicy. Early.
 - BULGARIAN:** Fruit large, dark red color. Rich flavor. Sweet. Late.
 - LAMBERT:** Very large fruit, dark-red. Flavor sweet, or very mild sub-acid, aromatic, rich.
- We also have a limited supply of Peaches and Apricots on hand.*

BE SURE YOU PLANT GENUINE ESPALIER FRUIT TREES
